# Resilience and Rights: Advancing Women's Sexual and Reproductive Health in an Era of Crisis

### Message from the Guest Editor

Contemporary global crises, including climate change, armed conflicts, pandemics, and the erosion of democratic institutions, are disproportionately impacting women and girls, particularly in the realm of sexual and reproductive health and rights (SRHR). These emergencies exacerbate existing gender inequalities, restrict access to essential health services, and undermine progress toward gender equity. Despite the urgency, SRHR programs—ranging from modern contraceptive access to comprehensive sexuality education—are insufficiently integrated in interventions designed to enhance women and girls' health, resilience, and empowerment.

The focus goes beyond emphasizing the need to protect women and girls to also examining how robust, well-integrated programs, policies, and advocacy efforts can strengthen crisis responses in both the short and long term. By exploring actionable strategies and emphasizing the transformative potential of SRHR interventions, this collection seeks to inspire solutions that enhance resilience, equity, and empowerment for women and girls worldwide. We welcome submissions from diverse disciplines and methodologies.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
