

## Special Issue

# Public Health Interventions to Reduce Road Traffic Injuries

### Message from the Guest Editor

Traffic injury and mortality is a global health issue, resulting in more than one million deaths annually and contributing to significant injury, long-term disability, and health care system burden worldwide. Reduction in road traffic injuries can be accelerated through effective public health interventions and multi-sectoral collaborations. Such reductions require the development and scaling up of effective, affordable countermeasures for longstanding recalcitrant issues such as safety equipment use; speeding; and driving impaired by drugs, alcohol, fatigue, or distraction. Transportation data surveillance systems, legislation, and enforcement have lagged in comparison to the growth in vehicle automation and in motorized two-wheeled vehicles such as e-bikes, scooters, and shared vehicles. Given this background, topics of interest for this Special Issue include submissions that address the issues noted above, as well as culturally effective behavioral approaches for all road users, improved post-crash care, advances in linked health and crash data surveillance systems, Safe Systems, and other issues concerning public health approaches to improving roadway safety.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
