

## Special Issue

# Research on Suicide Assessment, Prevention and Management

### Message from the Guest Editor

This Special Issue welcomes papers related to the following:

- Assessment and management of suicidal behavior, mental health issues, and substance use disorders;
- Follow-up and community support for discharged patients;
- Improved access to health care (improved mental health literacy);
- Increased awareness of mental health and suicide (e.g., reduced stigma);
- Intervention and postvention support for vulnerable groups;
- Interventions related to community and relationship risk factors;
- Interventions related to health system and societal or individual risk factors;
- Management of gatekeeper training and crisis support services;
- Measures for responsible media reporting;
- Mental health policies intended to reduce suicide mortality;
- Restricted access to tools (e.g., pesticides, firearms, and hazardous gasses).

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
