

Special Issue

2nd Edition of Mining and Environmental Health: Challenges and Opportunities

Message from the Guest Editors

In recent decades, as a response to mounting public pressure and stricter environmental regulations, the mining industry has taken strong actions to minimize its impact on the environment and has invested heavily in newly developed systems to recover resources from wastes and energy from mine water. This Special Issue welcomes high-quality papers that examine the lights and shadows of the relationship of mining and the environment. We seek contributions from all around the world on the evaluation of the effects of mining on local populations and ecosystems, associated risks, and remediation options, as well as on the use of mining wastes and water as resources.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
