

## Special Issue

# Work Psychology and Occupational Health

### Message from the Guest Editor

This Special Issue welcomes manuscripts that focus on topics such as (1) the effect of the pandemic on the working environment; (2) the relationship between the pandemic and the psychological effects on workers, and (3) maintenance and/or measures for workers' health (especially mental health) during the pandemic. The key items for the above objectives are: introduction and increase of telework and online operations; changes in the working environment such as reduced working hours, dismissal, and the effects of unemployment; changes such as increased stress and decreased coping strategies among workers; increased loneliness, and isolation, as well as decreased opportunities for communication—including opportunities for employees to meet for mental health resources—and an increase in the need for self-care as a stress-coping method that can be practiced by one person. It also includes hands-on experience in dealing with the increase in serious stress and loneliness via strong support at the organizational and individual levels.

### Guest Editor

Prof. Dr. Masahito Fushimi

Akita University Health Center, Akita University, 1-1 Tegatagakuen-machi, Akita 010-8502, Japan

### Deadline for manuscript submissions

closed (31 December 2024)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
