

Special Issue

Accidental and Environmental Hypothermia

Message from the Guest Editors

This Special Issue will deal with a multitude of physiological and pathophysiological aspects of accidental and environmental hypothermia and cold injuries. The whole range of adaptations to cold, from the animal to the human, will be covered to elucidate adaptive mechanisms that may open new research and, hence, treatment options. Special attention will be paid to cooling in different environments (e.g., snow and water), insulation, diagnosis of hypothermia, rewarming, and prognostication of outcome after hypothermic cardiac arrest.

Guest Editors

Dr. Peter Paal

Prof. Dr. Hermann Brugger

Dr. Mathieu Pasquier

Dr. Tomasz Darocha

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
