Special Issue

Anthropocene Challenges: Exploitation of Resources vs. Preservation of Natural Systems

Message from the Guest Editors

Twentieth-century human development has brought the Earth into a new epoch that has been defined by many researchers as the Anthropocene. In the Anthropocene, scientists have to face a new and challenging problem: How to support human well-being without compromising the Earth's capacity to provide the resources that human societies need. A pivotal role for this aim is played by the geo scientists involved in deepening the knowledge of our, and other, planets. This Special Issue focuses on:

- Soil/water management and quality
- Heavy metal pollution, remediation, restoration
- Cohabitation with heavy metals anomalies
- Circular economy: re-utilization of wastes
- New ore deposits and geo-resources
- Renewable energy sources
- Urban geology, smart cities and health
- Environmental resilience

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
