

## Special Issue

# Human Adaptation to Climate Change

### Message from the Guest Editor

Climate change is the “biggest global health threat of the 21st century”, a perspective supported by the US National Institutes of Health, two Lancet Commissions, and the Canadian, American, Australian, and British Medical Associations. The World Health Organization estimates 250,000 deaths annually directly due to climate change by 2030, with over half attributable to food systems, security, and safety; and indirect impacts are projected to be significantly higher. Given these challenges, communities and health systems will have to adapt. These responses may be reactive or anticipatory in relation to climate change impacts, range from building resilience to designing and implementing specific interventions to a known risk, and encompass actions at various scales from individuals and communities to governments and institutions. This Special Issue is open to any subject area related to adaptation to the health effects of climate change.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
