# Addressing Public Health and Health Inequities in Marginalized and Hidden Populations

### Message from the Guest Editors

Marginalized populations include a broad range of groups who face disproportionate health inequities resulting in compromised health and wellbeing outcomes. To address these inequities across various social determinants and health conditions, public health researchers, clinicians and policy makers work with individuals and communities from diverse backgrounds. As a result of this work, public health stakeholders have become more aware of hidden populations. These are cohorts not typically addressed by mainstream public health programs or models and who are sometimes overlooked in public health work focused on marginalized populations. This may be due to language barriers or geographical location. Often this cohort within marginalized populations experiences multiple and intersecting social and environmental disadvantages such that the public health and wellbeing of whole communities is affected.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
