New Advances in Cervical Cancer

Message from the Guest Editor

Cervical cancer is the fourth most prevalent cancer in women and is the leading cause of gynecologic cancer death worldwide. The World Health Organization aims to eliminate cervical cancer using screening program and vaccination strategies against human papilloma virus (HPV) infection. Offering the best possible care, in terms of innovation, to women diagnosed with invasive cancer is a challenging objective for improving treatment quality. This Special Issue is expected to provide the most updated therapeutic-related advances and possible future directions in cervical cancer.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
