# Current Challenges in the Study and Prevention of Sexual Aggression in Youth

# Message from the Guest Editors

Youth Sexual Aggression and Victimization (YSAV) is an international public health problem that can cause significantly negative effects on the well-being of victims and perpetrators. Prevalence data, although they do not coincide according to different studies, are alarming: the lack of consensus may be due to both how this topic is defined and how it is evaluated: therefore, it would be desirable to move towards a greater agreement on the definition of YSAV and its evaluation. Another important challenge lies in developing broad and holistic explanatory models that, from an ecological perspective, take into account different key protective and risk factors for YSAV. These models, which must incorporate different levels of influence (from individual to social ones), seem to be essential for the design of effective preventive programs. With this background, this Special Issue of IJERPH focuses on the current state of YSAV. Submitted manuscripts can be both original research and theoretical reviews, in both cases focusing on practical implications.

# **About the Journal**

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

# Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

## **Author Benefits**

# **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
