Special Issue

Environmental Innovation in the Agri-Food Sector

Message from the Guest Editors

This Special Issue will collect theoretical or empirical manuscripts that can add knowledge and experiences in the field of addressing eco-innovation in the agri-food sector in order to reduce the use of natural resources, decrease the release of harmful substances, and improve an agri-food firm's environmental performance. Covered topics include the definition of the concept of environmental innovation in farming and agri-food commercialization activities, the identification and evaluation of factors fostering eco-innovation, measurement tools for assessing eco-innovation implementation, organizational barriers, added value in farmers because of green innovations, new challenges to become more eco-innovative, among others. We will give priority to papers with a multidimensional approach to the analysis of environmental innovation in the agrifood sector.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
