Special Issue

Neurological Disorders: From Alcoholism to Environmental Pollution

Message from the Guest Editor

This Special Issue aims to better understand the effects of alcohol and environmental pollutant exposure on the nervous system, ranging from neurodegeneration to neuroinflammation. It is my pleasure to invite researchers that are working in vitro, in vivo and ex vivo, to submit original research manuscripts focusing on neurological disorders related to alcoholism or environmental pollution. Despite the aetiology of these disorders still being poorly understood, the central role of environmental pollutants and alcohol as putative risk factors is gaining more and more importance. Neurotoxic heavy metal, pesticides, metal-based nanoparticles, polychlorinated biphenyls, polycyclic aromatic hydrocarbons and alcohol contribute to chronic neurodegenerative diseases and neurodevelopmental disorders that lead to enormous direct and indirect healthcare costs, and millions of deaths worldwide every year. In this regard, a better understanding of the pollution- and alcoholismassociated neurodegeneration may improve the knowledge in the field, and ameliorate the public health outcomes.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
