

Special Issue

Asbestos Exposure and Health Impact

Message from the Guest Editors

Asbestos is one of the most widespread occupational carcinogens. This Special Issue focuses on the current state of knowledge on the relationship functions between asbestos exposure and the occurrence of asbestos-related diseases and on the estimates of the health impact of asbestos at global and local level. In addition, papers on protocols for early diagnosis and health surveillance will be appreciated.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward
