

## Special Issue

# Bioremediation of Contaminated Soil: Current Status and Challenges

### Message from the Guest Editor

The soil heavy metal contamination has highlighted the importance of robust health systems for achieving health security. While perhaps our focus has been on the spatial distribution of current status, the need for strong and resilient health systems is just as important to address the remediation and their environmental, social, and economic risks during the remediation process. It is these, and related aspects of health development, that this special edition of *IJERPH* will explore. With such a premise, submission on topics including, but not limited to, the following are welcome:

- Soil heavy metal contamination and risk assessment;
- Soil heavy metal and the talent human health risks;
- Soil health system financing, social protection, and insurance;
- Reasonable utilization of agricultural and industrial land;
- Soil heavy metal sources and source apportionment;
- Soil health information systems and management.

### Guest Editor

Dr. Guangcai Yin

School of Environmental Science and Engineering, Guangdong University of Technology, Guangzhou 510006, China

### Deadline for manuscript submissions

closed (30 June 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
