

Special Issue

Breast Cancer Health Disparities and Prevention

Message from the Guest Editors

This Special Issue seeks to highlight the latest research, knowledge, and work in addressing environmental factors underlying breast cancer risk. We seek reviews and original research on environmental influences on breast cancer risk or risk factors, including primary prevention interventions and programs and policies that address environmental risk factors for breast cancer. Priority will be given to manuscripts that consider disparities in exposures and/or outcomes in population groups experiencing socioeconomic and/or environmental disadvantage and greater barriers to health, including racial/ethnic, gender and sexual minority, low socioeconomic, medically underserved, and immigrant groups.

Guest Editors

Dr. Parisa Tehranifar

Department of Epidemiology, Columbia University Mailman School of Public Health, New York, NY 10032, USA

Dr. Jasmine A. McDonald

Department of Epidemiology, Columbia University Mailman School of Public Health, New York, NY 10032, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
