

Special Issue

Social Capital and Rural Health

Message from the Guest Editors

Social capital resources including social networks, shared values, norms, trust, and leadership influence how communities come together to take advantage of opportunities and solve problems, and how effectively they can access external resources for community benefit. There is room for more evaluation of what works where and when in drawing on social capital for innovative service delivery, wellbeing programs, and for attracting and retaining health professionals in rural communities. Papers addressing these topics are invited for this Special Issue, especially those combining a high academic standard coupled with a practical focus on providing innovative solutions for the provision of services, supporting community wellbeing, or attracting and retaining health professionals.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
