

Special Issue

Health and Healthcare for Transgender and Gender Diverse Communities

Message from the Guest Editors

This Special Issue focuses on the current state of knowledge at the intersection of health, healthcare, and the transgender/gender-diverse population. In order to better understand the lived experiences of transgender and gender-diverse individuals around their health and accessing healthcare, we are interested in papers that continue to move this conversation forward, explore new areas of healthcare experiences that have not yet been explored, look at gender differences within the transgender and gender-diverse population, advocate for supporting the training and development of trans-affirming healthcare providers, focus on the resilience of transgender and gender-diverse individuals when it comes to their health, center the experiences of diverse populations within this group, and/or use innovative research methods not often used with this population. The main article types are Articles, Reviews and Case Reports. **Keywords:**

- healthcare and healthcare providers
- transgender health
- nonbinary health
- trans-inclusive healthcare
- trans-affirming healthcare
- mental health
- sexual and reproductive health
- gender-diverse health
- trans youth health

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
