Special Issue

New Challenges and Crucial Topics for 2030 Public Health

Message from the Guest Editor

The Special Issue is meant to show the current and future challenges that global health and national health services have to face in the next 10 years. In 2015, United Nations defined the Sustainable Development Goals, pledging to "leave no one behind" and including a focus on "ensuring healthy lives and promoting wellbeing for all at all ages". With the main aim of reaching universal health coverage and sustainable financing for health, it is essential to realize joint actions in order to deal with the increasing burden of noncommunicable diseases, with particular attention to mental health, and with growing public health priorities, like antimicrobial resistance and health determinants such as air pollution and inadequate water and sanitation, and in order to address potentialities and critical issues of digital health and communication through social media and other new opportunities that are expanding today. Above all, specific strategies are needed to support and improve the health of high-risk groups, such as migrants, women, LGBT+ people, minorities, and other frail or vulnerable populations.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
