

Special Issue

Child Abuse and Prevention

Message from the Guest Editor

Child abuse occurring in homes, schools, communities, and the virtual world is a global public health problem with immediate and life-long detrimental consequences on victims' physical and mental health, development, and behavior. This Special Issue of International Journal of Environmental Research and Public Health (IJERPH) will focus on the cutting-edge knowledge on child abuse and prevention strategies, including child physical abuse, psychological abuse, sexual abuse, neglect, children exposed to intimate partner violence, adolescent dating violence, and cyber violence. Empirical research (quantitative or qualitative), preventive program evaluations, and systematic reviews manuscripts are all welcome in this issue. Papers focusing on effective measures to prevent child abuse and neglect are especially welcome. We are open to accepting manuscripts from different cultures and disciplines, including but not limited to social work, public health, medicine, family studies, social policy, law, criminology, psychology, and education.

Guest Editor

Dr. April Chiung-Tao Shen

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits
