

Special Issue

Recent Advances in Child Abuse Research

Message from the Guest Editor

The *International Journal of Environmental Research and Public Health (IJERPH)* welcomes submissions for a Special Issue under the section of Children's Health, focusing on "Recent Advances in Child Abuse Research". Child Abuse is a serious social problem, due to both its high incidence and its short- and long-term consequences. Research on the effects of Child Abuse reveals numerous psychological, social, and behavioral difficulties for survivors. The aim of this Special Issue is to attract world-leading research in the Child Abuse field, in an effort to show recent progress in the area, including advances in survivor assessment, psychosocial effects, and abuse prevention. Submissions should include original articles, brief reports, or critical reviews (systematic reviews or meta-analyses).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
