

Special Issue

Child Labour, Working Children and Health

Message from the Guest Editors

This Special Issue is devoted to recent findings on “Child Labour, Working Children and Health”. This Issue will make a substantial contribution to the measurement of health outcomes among child labourers and working children. We particularly welcome submissions that focus on the following, under-studied topics and regions:

- Psychosocial health of child labourers/working children;
- Long-term health impacts of child labour into adulthood;
- Evaluations of interventions for current working youth;
- Workplace violence measurement among child labourers/working children;
- Occupational health risks and outcomes measurement among child labourers/working children;
- Empirical studies that explore thresholds at which particular tasks become hazardous for health;
- Empirical studies that include control groups of non-working children;
- Validation studies of outcome measures used with child labourers/working children.

Papers may be methodological or subject matter specific. Studies may involve primary or secondary quantitative or qualitative data. We also welcome systematic and scoping reviews on these topics. We look forward to receiving your submission.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
