

Special Issue

Different Views on a Child's Motor Development and Motor Performance

Message from the Guest Editor

We are pleased to announce the Special Issue entitled “Different Views on a Child's Motor Development and Motor Performance”. This Special Issue titled “Different views on a child's motor development and motor performance” will gather information on diagnostic and therapeutic options, as well as the impact of various risk factors on the motor development of children from the neonatal period to the teenage period. For specialists dealing with children (medical, physiotherapists, psychologists, or educators) investigating the very process of motor development and disorders resulting from the disease and analyzing the influence of various risk factors. We are seeking papers by scientists from around the world in an open access form, both original papers and high-quality reviews.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
