

Special Issue

Child Nutrition Management

Message from the Guest Editors

We are organizing a Special Issue on “Child Nutrition Management” in the *International Journal of Environmental Research and Public Health*. The venue is a peer-reviewed scientific journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal, we refer you to <https://www.mdpi.com/journal/ijerph>. It is important to understand the factors (e.g., school meal programs, physical activity, diet, social media use, and environment) that contribute to child nutrition and health and the mediators and moderators of these relationships. Prospective articles could include programing and projects that are intended to improve and enhance nutrition and health for the benefit of children. Thus, research into these and related areas should focus on methods of improving the nutrition and health of children. This Special Issue is open to any subject area related to the management of child nutrition. The listed keywords suggest a few of the many possibilities.

Guest Editors

Prof. Dr. Ethan Bergman

Department of Health Sciences, Central Washington University,
Ellensburg, WA, USA

Dr. Nicole Stendell-Hollis

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
