## Child Victimization

### Message from the Guest Editors

Child victimization, the victimization experience by various forms of violence, including, but not limited to, child abuse and neglect by parents, violence, and bullying by peer and siblings, and exposure to neighborhood violence and crime, has been demonstrated to be a prevalent problem that leads to different negative impacts on victims. Recent research efforts have been focused on combating child victimisation through early identification, cultural-specific prevention and intervention, as well as multidisciplinary collaboration among professionals from various fields. This Special Issue on “Child Victimization” seeks articles on different kinds of child victimization, with a special focus on (i) child polyvictimization, which is the exposure to multiple types of victimization; (ii) associations between child victimization and other kinds of violence within the same family; (iii) cultural-specific issues on the problem, and (iv) prevention or intervention programs involving multidisciplinary collaboration. Empirical studies, systematic reviews, and meta-analytic studies will be considered. and

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
