

Special Issue

Clinical Communication in Rehabilitation

Message from the Guest Editors

Papers addressing challenges and communication aspects in the field of cognitive rehabilitation are invited for this Special Issue, in particular those combining high academic standards with a practical focus that can illuminate clinical encounters. A breadth of research methods addressing such communication aspects as empathy, relation-, patient- and professional-centered approaches, informing and planning, non-verbal aspects, difficult situations and emotions, or interprofessional interactions, with patients of different ages and/or their care takers, are welcome.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
