

## Special Issue

# Clinical Health Psychology for Cancer Experience: Current Challenges among Prevention, Treatment and Chronicity

### Message from the Guest Editors

The increase of cancer survival rates generates a rise in people living in a chronic condition. The patient is involved in adaptation and engagement processes that open to complex psychological needs, such as: changes in daily routine, drug intake, side effects, fear of recurrence, and follow-up checks. These conditions impose the psychic challenge of constructing a new continuity/balance of life narrative by integrating the recovery of personal health within a condition of chronicity. Within the One Health framework it is relevant to define the main trajectories by which clinical health psychology can be inscribed in social contexts and practices involved in cancer prevention, treatment and chronicity. In this Special Issue, we invite authors to enrich the actual national and international debate with contributions that deepen one or more of the three aforementioned domains: prevention, treatment, and chronicity. Research papers, longitudinal studies, reviews, case reports, brief reports, conducted through qualitative, quantitative, or mixed methods within different types of cancer and/or illness experiences-are welcome.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
