

## Special Issue

# Community Participation in Health Promotion: Challenges and Successes

### Message from the Guest Editors

Community participation is a key element of effective health promotion, ensuring it adequately addresses the needs of community members. Community members hold important local knowledge that may feed into health promotion programs, research, and policy, contributing to its effectiveness. In health promotion, professionals often struggle to engage community members. For communities, it is not always clear how their input was used. Insight into best practices, explaining what works, how it works, and in which context, is needed to improve community participation in health promotion. We invite you to submit papers about community participation in health promotion that address issues, such as effective approaches for community participation; the societal impact (e.g., health literacy, empowerment, social cohesion) of community participation; practical and ethical challenges; and the role of professionals, researchers, and policymakers.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
