

## Special Issue

# The Impact of the COVID-19 Pandemic for Health Inequalities

### Message from the Guest Editors

The COVID-19 pandemic continues to be rampant, resulting in hundreds of millions of cases and millions of deaths worldwide since early 2020. While many of the containment and mitigation measures are in place with the primary purpose of protecting the health of the public against the deadly virus, a growing body of evidence has suggested that the pandemic, along with its stringent and sometimes draconian measures, has exposed and exacerbated inequalities in health. In this Special Issue, we would like to invite researchers from around the world to share their findings with regard to the impact of the pandemic on health inequalities, so that possible implications for public health and policies can be highlighted for pandemic control in the future beyond the current COVID-19 pandemic.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
