

## Special Issue

# Facial and Dental Pathologies: Relationship with Systemic and Public Health

### Message from the Guest Editors

Facial and dental health plays a very important role in the organism general balance: caries, periodontal pathology, TMJ disorders, mucosa lesions, and maxillofacial pathologies have a significant impact on individual and public health, and may lead to systemic diseases.

The analysis of etiopathogenesis, early diagnosis and prevention, represent the key point in the management of the oral and maxillofacial pathologies. The technical improvement of dental materials and the development of treatment plan with a minimally invasive approach allows the local and overall health to be improved.

Therefore, knowledge and innovation in these fields are essential to preserve collective health and individual well-being.

The aim of this Special Issue is to create a platform for researchers and university groups to share their original paper, clinical research and literature review, regarding oro-maxillofacial pathologies and minimal invasive treatment plan and their relation with the public health.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
