

Special Issue

Social and Digital Media: Implications and Opportunities for Health Equity

Message from the Guest Editor

Advances in digital communication have resulted in extraordinary opportunities to engage with communities, including end-users, designers, health practitioners and, importantly, marginalized populations. Nonetheless, this rapid evolution of digital media as a mechanism for health-related social and personalized healthcare warrants close attention. This Special Issue invites manuscripts that detail inclusive, open, social-media- and digital-health-focused interventions that contribute to reducing health inequities. We invite papers on the design, adaptation, implementation and evaluation of mobile and digital initiatives that promote social and behavioral change.

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
