

## Special Issue

# Racial and Ethnic Disparities in Chronic Conditions among Adults and Older Adults: Second Edition

### Message from the Guest Editors

We encourage empirical research on race or ethnicity and chronic conditions related to the following (or limiting) topics:

- Incorporating the social determinants of health with biomedical frameworks.
- Examining pathways linking individual, interpersonal, and/or structural determinants to chronic conditions.
- Intersectionality of race or ethnicity with age, gender, socioeconomic status, place, sexuality, etc., as part of existing pathways influencing chronic conditions.
- The prevalence of multiple chronic conditions or comorbidity and people's experiences managing them (i.e., self-care and medical care).
- Family health history influencing health behaviors related to chronic conditions.
- Health information seeking and use behaviors related to chronic conditions.
- Current or future health care workforce needs to provide the best care for patients with chronic conditions.
- Creating prevention, intervention, and/or policy solutions to reduce racial and ethnic disparities in chronic conditions.
- Long-term effects of COVID-19, particularly among older adults

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
