

## Special Issue

# E-health and Care Management

### Message from the Guest Editors

eHealth includes the technological tools involved in the prevention, diagnosis, and treatment of a disease, as well as the patient's management. These strategies improve the quality of healthcare provided, and they are becoming increasingly important because of the growing number of the international circulation of citizens and number of patients. eHealth initiatives, therefore, improve healthcare and sustainability, pointing out the patient and their positive outcomes.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
