

Special Issue

Economic Crisis and Healthcare Services

Message from the Guest Editor

Our Special Issue attempts to highlight the mechanisms upon which the economic crises affect health, health outcomes, and healthcare-seeking behavior. It documents the need for expeditious and efficient interventions. In addition, it presents the empirical experience from policies that have been implemented to counterbalance the effects of a rapidly slowing economy and critically evaluates their results on health and healthcare.

Evidence-based suggestions on the causes, the effects, and the response to the problem are within the scope of this Issue. High-quality scientific and policy papers, both empirical and theoretical, from academicians and researchers are welcomed.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
