

Special Issue

Application of Environmental Functional Materials in Wastewater Treatment

Message from the Guest Editors

It is our pleasure to announce a new Special Issue in the *International Journal of Environmental Research and Public Health (IJERPH)* on “Application of Environmental Functional Materials in Wastewater Treatment”. This Special Issue aims to provide an overview of the most recent advancements in the field of environmental functional materials applied to wastewater treatment and will publish selected contributions on the design, preparation, and application of environmental functional materials and the state of novel methodologies and innovative techniques in wastewater treatment. Potential topics include but are not limited to:

- Inorganic nonmetallic materials in wastewater treatment;
- Metal-organic frameworks (MOFs) in wastewater treatment;
- Covalent organic framework in wastewater treatment;
- High-performance structural ceramics and composites in wastewater treatment;
- Biomaterials in wastewater treatment;
- Layered double hydroxide (LDH) in wastewater treatment.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
