

## Special Issue

# Impact of Exercise and Sports on Health

### Message from the Guest Editor

Sedentary behaviour is one of the biggest health issues facing society. Inactivity is associated with increased risk for a number of diseases, such as type 2 diabetes, cardiovascular disease, cancer, and dementia. We are seeking research papers examining the impact that exercise or sport interventions can have on the health and wellbeing of a population, for example, research papers examining general population disease risk, specific disease populations, and ageing. Such research papers should look to explore clinically relevant endpoints and/or impact on quality of life.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
