

Special Issue

Feature Papers: Intersections of Mental and Sexual Health in Youth and Adults

Message from the Guest Editors

In this Special Issue, we invite and encourage global/international/cross-cultural perspectives on the intersections of physical, mental, and sexual health, with sexual health broadly defined by the key phrases listed below. We express further interest in understudied phenomena (e.g., paraphilia in non-Western cultures), understudied problems in various areas of the world (Asia, Africa, etc.), and understudied populations, including vulnerable peoples—whether beset by comorbidities/disease/disability or by oppression or neglect. The goal is to bring to light issues concerning sexuality by provoking thought, initiating discussion, and suggesting strategies for understanding and improving sexual health in all types of settings—both high- and low-resource environments.

Guest Editors

Prof. Dr. David L. Rowland

Prof. Dr. Zainab Zadeh

Dr. Nieves Moyano

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
