Special Issue

Epidemiology and Health Surveillance Research

Message from the Guest Editor

In these times of the COVID-19 pandemic, epidemiology and public health surveillance have become of greater prominence and significance. Both remain fundamental to all aspects of public health and have contributed to major gains in improving and protecting the health of populations. Of major importance is the translation of findings from these research areas into public health action, and in their roles as evidence for policy development and decision-making.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
