

## Special Issue

# Health-Related Behaviours during the COVID-19 Pandemic

### Message from the Guest Editors

Although it is well-known that confinement-related measures contribute to slow down the spread of SARS-CoV-2, this might also imply a radical change in the lifestyle of the population, disrupting usual daily activities. These changes of health-related behaviors such as insufficient physical activity, lower fruit or vegetable consumption, higher screen exposure, or alcohol consumption above the recommended levels might have negative effects on health. Further, the potential change of daily routines due to restriction measures might vary the schedules and family-related planification involving different occupational habits (e.g., higher sitting time, longer working days, or different movement patterns), which might influence either musculoskeletal or mental health. For this Special Issue, high-quality observational, experimental, and review studies that provide evidence about the status of health-related behaviors during the COVID-19 pandemic and their potential consequences over health are welcomed. ## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
