Health Care Needs of Migrants: Guarding the Most Vulnerable— Refugees, Women and Children

Message from the Guest Editors

Migration is a key challenge of the 21st century. Currently, 258 million migrants are living out of their country of birth. Migration creates challenges and opportunities. Many of those migrants are especially vulnerable—refugees, children, women, and disabled persons. Very little is known about the healthcare needs of these most vulnerable groups.

This Special issue focuses on the healthcare needs of these most vulnerable migrants. It will help to serve those migrants in need.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
