

Special Issue

The Environmental, Public Health, and Human Rights Impacts on Enhancing the Quality of Life of People with Intellectual Disability

Message from the Guest Editor

Societal views on the human rights of persons with disabilities have significantly changed over the last four decades. However, while achieving equality, autonomy, non-discrimination, participation and inclusion should be a priority, abuses and violations of rights often occur in the most immediate environments of people with intellectual disability. This Special Issue is intended to discuss the role of context, the provision of inclusive environments, the improved health status and quality of life of people with intellectual disability. Therefore, we call for manuscripts addressed to promote quality of life-related personal outcomes and enhance a life of quality and equality for people with intellectual disability. Potential topics include, but are not limited to, research on rehabilitation, health (physical, social, and emotional), education, employment, inclusion, supports, leisure, and other personal (e.g., age, gender, intellectual functioning, adaptive behavior, diagnostic group) or environmental variables (normative expectations, attitudes, opportunities, accessibility, type of services, culture, rights).

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
