# Advances in the Health Effects of Place and Social Inequality

# Message from the Guest Editor

Income inequality has sharply increased in recent years. Statistics show that the top one percent of the population captures a much larger share of total income growth. In the US in the last four decades, the actual annual earnings for the top 1% and bottom 90% increased by 158% and 24%, respectively, with wider gaps between men and women. Similar trends have been observed in other countries. The alarming trends in income inequality raise questions: What is happing if income inequality stays high? Does it harm all communities or only poor people, and who will suffer more? Race and place are two other predictors of high income inequality and worse health outcome. Almost all socioeconomic factors, including income, are influenced by race and ethnicity. The National Academies of Sciences, Engineering, and Medicine has reported that African Americans and the poor consistently exhibit higher rates of multiple diseases, physical and mental impairment, functional limitations, and disabilities. In this Special Issue we want to learn how income inequality, race, and place drive health outcomes in communities.

# **About the Journal**

# Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
