

Special Issue

Health Management and Innovation

Message from the Guest Editor

This Special Issue calls for papers dealing from a broad point of view with the adoption of management and innovations in health systems, the creation of value in the provision of public health services, and public health management. We encourage the submission of manuscripts that focus on but are not limited to the following topics:

- Efficiency in Healthcare Provision and Spending;
- Public Health Management;
- The Process of Innovation in Health;
- Co-creation of Value in Healthcare Services;
- Health and Pharmaceutical Policy;
- Market Access and Public Financing for Innovative Products;
- Health Technology Assessment;
- Chronic Care Models and Integrated Care Provision.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA
