

Special Issue

Improving Health Management and Well-Being for Young and Older Adults with eHealth and mHealth

Message from the Guest Editors

How can ICTs help us to improve eHealth and mHealth? Information and communication technologies are shaping the way health and mental health are managed. The aim of this Special Issue is to publish studies concerning efficacy, (cost-)effectiveness, acceptability, usability or user experience issues of systems aimed to improve the quality of life, mental health or eHealth management in young and older adults. Special attention will be given to innovative submissions using ICTs to improve the current health management model. Other manuscript types of interest include systematic reviews, relevant position papers, and brief reports.

Guest Editors

Dr. Diana Castilla

Dr. Carlos Suso-Ribera

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
