

## Special Issue

# Healthy Cities: Bridging Urban Planning and Health

### Message from the Guest Editor

The predominantly negative impacts of urban environmental pollution, climate change, traffic congestion, the COVID-19 pandemic, the insufficient and unbalanced supply of public facilities and services, and the qualities of the built environment and social settings on public health and well-being have received increasing concern. Building a healthy city has been challenging for urban planning, governance, and design by linking with multiple SDGs. There is an imperative need to smartly incorporate the new dimension of health into planning process through developing healthy urban planning frameworks. This Special Issue aims to recruit manuscripts on the original theories and innovative methods of relevant topics in the subject areas of urban health geography, urban environment exposure and health risks, urban residents' health behavior, urban medical service accessibility and social equity, healthy communities and streets, and healthy city design. Comparative empirical studies and critical reviews are also welcome. The applications of new technologies such as machine learning, virtual and mixed reality, and UAVs are particularly encouraged.

### Guest Editor

Prof. Dr. Suhong Zhou

School of Geography and Planning, Sun Yat-sen University, Guangzhou 510006, China

### Deadline for manuscript submissions

closed (27 March 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
