

## Special Issue

# What Is a Healthy Oral Microbiome?

### Message from the Guest Editors

It has recently been reported that gut microbiome dysbiosis is strongly related to the outbreak or development of cancers and other systemic diseases. There is legitimate concern that oral microbiome dysbiosis is one of the causes of gut microbiome dysbiosis. However, oral microbiome dysbiosis has not been clearly defined due to the lack of understanding of what factors constitute a healthy oral microbiome. Indeed, ambiguous and insufficient information on healthy oral microbiomes have made it difficult to compare disease cohorts among studies. To improve the understanding of oral microbiome dysbiosis, this Special Issue seeks research papers on various aspects of a healthy oral microbiome. We encourage the submission of cohort studies that focus on a healthy oral microbiome, which may be based on diverse factors such as the individual, age, gender, diet, habits, and various conditions. We also accept comparison studies that include a healthy control group. Furthermore, we welcome the submission of oral microbiome studies utilizing any type of omics analysis that would enrich our information on what constitutes “a Healthy Oral Microbiome.”

### Guest Editors

Dr. Izumi Mashima

Department of Oral Medical Science, School of Dentistry, Ohu University, 31-1 Misumido, Tomita-machi, Koriyama, Fukushima 963-8611, Japan

Prof. Dr. Futoshi Nakazawa

Department of Oral Biology, Faculty of Dentistry, Universitas Indonesia, Salemba Raya No. 4, Jakarta Pusat 10430, Indonesia

### Deadline for manuscript submissions

closed (30 September 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
