Promotion of Healthy Work

Message from the Guest Editor

We invite submissions filling the knowledge gap on how we should design work in various occupational groups so that it promotes health. Examples of research questions can be:

- How does a productive working day promoting health look like?
- Which combination of sitting, standing, and walking at work promotes health?
- Can working tasks be modified so they provide beneficial physiological responses and adaptations?
- How can we develop and implement changes in productive work to promote health?
- Are workplace interventions aiming to design productive work promoting health feasible, effective, and sustainable?

Guest Editor

Prof. Andreas Holtermann

The National Research Centre for the Working Environment, 2100 Copenhagen, Denmark

Deadline for manuscript submissions

closed (30 November 2020)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
