

## Special Issue

# HIV/AIDS Testing and Prevention

### Message from the Guest Editors

HIV/AIDS remain a major public health problem, with over 38 million people living with HIV/AIDS globally, the majority of whom are in Sub-Saharan Africa. This is despite the incredible advancements made in antiretroviral treatment (ART) and HIV prevention interventions. The main cornerstone of HIV elimination remains the prevention of new infections; however, the incidence of HIV is still a problem, especially in Africa. Biomedical HIV prevention interventions, including male condoms, medical male circumcision, and PrEP, have contributed immensely to HIV prevention; however, there remains the need for women-controlled approaches, such as vaginal microbicides. Social, economic, and structural interventions, including cash payments and the educational uplifting of young women, have also been carried out. This Special Issue aims to provide evidence of HIV testing and prevention in Africa. Systematic reviews, scoping reviews, and research articles are all welcome in this issue.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
