

Special Issue

Tourism/Hospitality and Well-being

Message from the Guest Editor

Well-being is one of the most important research topics in social sciences. Thus, this Special Issue will focus on two critical well-being issues in the tourism/hospitality industry: (1) employee workplace well-being and (2) customers' well-being perception (quality of life). First, employee workplace well-being covers human resource management in the hospitality industry (airline, hotel, restaurant etc.). Second, customer well-being perception covers consumer behavior in the tourism/hospitality industry. Besides covering the main two well-being perceptions, other areas will also be covered in the Special Issue, including tourism/hospitality and stress management, tourism/hospitality and quality of life, mental health in the tourism/hospitality industry, tourism/hospitality and happiness, and job stress in the tourism/hospitality industry.

Guest Editor

Prof. Dr. Sunghyup Sean Hyun

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
