Special Issue

Indigenous Health and Wellbeing

Message from the Guest Editors

Improving Indigenous health and wellbeing is an important objective for all who aspire to reducing health inequities. Indigenous people around the world share many common difficult and distressing experiences that have adversely affected their lives, including the experience of colonisation, discrimination and socioeconomic disadvantage. These things impact adversely upon both people's physical and mental health. The United Nations Declaration on the Rights of Indigenous People (2008) sanctioned cultural integrity and the rights of Indigenous peoples to practice and revitalise cultural traditions and customs. We now understand that health and wellbeing are broad concepts that incorporate not just our physical bodies but also social, emotional, cultural and spiritual aspects of health and wellbeing. So how is the health and wellbeing of Indigenous people faring following the 2008 Declaration on the Rights of Indigenous People?

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward
